DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 17 and 23-51 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-27 of U.S. Patent No. 6,773,664.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of US'664 teach a method of die casting an aluminum alloy with 3.0-4.5% Mg, 0.4-1.4% Mn, 0.4-0.9% Zn, 0.05-0.25% Zr, 0.3% max V, 0.3% max. Sc, 0.2% max. Ti, 1.0% max. Fe, 1.4% max. Si, balance aluminum (claim 1 of US'664), which overlaps or touches the boundary of the presently claimed alloying ranges.

Allowable Subject Matter

3. Claims 21 and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Said claims are not rejected under ODP because there is no overlap in Mg, and the said claims represent a separate and distinct alloy from the alloy in the claims of US'664.

Art Unit: 1742

4. The following is a statement of reasons for the indication of allowable subject matter (if the obviousness-type double patenting rejection stated above is overcome with regard to claims 17 and 23-51): the argument that there is no motivation to combine EP'900 or US'118 or WO'627 with JP'064, has been found persuasive. The prior art does not teach or suggest a method of die casting an Al-Mg-Mn-Zn alloy with the presently claimed alloying ranges.
